EDUCATION

George Mason University

Aug 2021 – May 2026

B.S. Computer Engineering · Concentration in Embedded Systems

Fairfax, VA

Dean's List, Fall 2025 · National Society of Black Engineers · STEM Collective

American College of Thessaloniki · Study Abroad Semester

Jan 2022 – May 2022, Thessaloniki, Greece

Osborn Park High School · Advanced Diploma, GPA: 3.96

Aug 2016 – Jun 2021, Manassas, VA

Biotech Scholar and Project Lead the Way (PLTW) Scholar.

EXPERIENCE

Qfin · Quantum ML Engineer

Aug 2025 – May 2026 · Fairfax, VA

- Led a year-long faculty-advised project applying quantum machine learning to financial portfolio optimization.
- Developed and benchmarked neural networks on quantum and classical hardware using **Qiskit**, **PyTorch**, and **scikit-learn**.
- Applied model predictions to classical portfolio optimization strategies, testing the hypothesis that quantum systems better capture nonlinear market patterns.

Tomahawk Edison Sciences · Computer Engineering Intern

Jun 2025 – Aug 2025 · Remote

- Evaluated pricing and performance trade-offs of single-board computers for aerospace applications.
- Prototyped commercial product designs; produced investor-facing 3D models and printed prototypes.

InsightLegi · DataStorm Research Team Member

Jan 2025 – May 2025 · Fairfax, VA

- Contributed to a faculty-led initiative for government transparency via legislative data aggregation (Dr. Tauheeda Yasin).
- Built web scrapers in **Node.js** (axios, cheerio, dotenv) targeting federal, state, and local government websites; stored output in JSON for InsightLegi's AI system.

Data Annotation · AI Trainer

Dec 2023 – Present · Remote

- Reviewed AI-generated code across multiple languages for correctness and flagged ethical/safety violations.
- Conducted data analysis using the **pandas** Python library to support annotation quality workflows.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, Assembly

Hardware: FPGA (Xilinx Basys 3 Artix-7), TI MSP430 (RISC/C/Assembly), Raspberry Pi

ML / Quantum: Qiskit, PyTorch, scikit-learn, pandas

Web / Tools: Node.js (axios, cheerio, dotenv), Wireshark, Splunk

CAD: Autodesk, Fusion 360, Onshape, KiCad

Productivity: Microsoft Office Suite, Google Workspace

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **CodePath Intermediate Technical Interview Prep** — Python-based program covering algorithmic problem solving and systematic problem decomposition.
- **CodePath Intermediate Cybersecurity Program** — Threat identification, mitigation, Linux terminal literacy; practical use of Wireshark and Splunk.
- **CompTIA A+** (In Progress) · **CompTIA Network+** (In Progress) — via MedCerts.
